

Environmentally Friendly Aqueous Varnish for Inline Coating AQUAPAC Varnish M-6

■ Environmentally Friendly Aqueous Varnish

AQUAPAC is an environmentally friendly aqua varnish with acrylic resin emulsion as primary constituent. Not only does it observe NL Regulation of Japan Printing Ink Makers Association, but it also does not contain any PRTR regulated substances. VOC (Volatile Organic Compounds) contents are extremely low. Its rapid drying property allows for non-spray stacking. It helps reduce operator's workload and improve working environment of the factory.

■ Features

AQUAPAC Varnish M Series enables high quality matte effects. This series can be used for catalogs and book covers, paper containers for food, medicine, and apparel. Inline coating by lithographic press is possible. Use water or water/alcohol (IPA, ethanol) solution in the ratio of 1/3-4 to dilute. (As alcohol causes varnish to flocculate, mix it with water before adding to varnish.). Matte effects, when too strong, can be adjusted by adding general purpose varnishes like F type.

■ Properties

	AQUAPAC Varnish M-6
Main Constituent	Acrylic resin emulsion
Physical	Milky white liquid
Solidity	34±2%
Viscosity	40~45sec
pH	8.0±0.5

(Viscosity: Zahn cup # 4/25°C)

Non-hazardous substance

Designated flammable (flammable liquid)

Water soluble

【Physical Property Radar Chart】

(Note: Values on the outer side represent better quality.)

- Offers excellent matte effects
- Excellent heat resistance
- Excellent gloss
- Excellent drying property
- Gluing suitability
