

## Additives

### No.2 UV Contex

---

"No.2 UV Contex" is a UV inks reducer. Besides general UV inks, it is useable for most UV inks like special UV inks, UV hybrid inks, and so forth.

#### ■ Features

- ▶ Effective reducer.
- ▶ Adding 5% reduces tack value by approximately 1.
- ▶ Adding it does not change ink's hard appearance.
- ▶ Addable range of 0~20% is wide.
- ▶ Applicable to both, offset as well as letterpress, printings.
- ▶ Effective in resolving paper dust problem. Further, it is also effective in letterpress printing.
- ▶ It contains liquid photoreactive initiator and therefore has little effect on ink's drying property.
- ▶ Useable for most UV inks.

#### ■ Handling Instructions

- ▶ When mixing with UV inks, use ink spatula to stir and mix well.
- ▶ Adding a large quantity may cause insufficient ink flow.
- ▶ In some cases, it may not be useable for inks like "UV OL SD" and "UV KFI". For detailed information, either refer to individual product's pamphlet or contact nearest Sales Office.
- ▶ Leaving under a fluorescent lamp or a direct sunlight can cause the surface to dry. Avoid storing in places of extremely high temperature or where direct sunlight enters.
